Professional Summary

Fresh Computer Engineering graduate with hands-on experience building responsive, data-driven web apps using React, TypeScript, and Tailwind CSS. Passionate about AI-powered products — I hold AI certifications from the ASEAN Foundation and actively use AI tools to ship clean, maintainable UI faster. Eager to learn, take feedback, and grow through real work and real projects.

Experience

QA Intern, HS Technologies (Phils.), Inc. 03/2026 – Present | Rosario, Cavite

- Assigned to develop MRF Digitalization — a React + Firebase web application replacing paper-based Modification Request Forms with a streamlined digital workflow including real-time data, Firebase Auth, and Cloudinary media uploads
- Developed reusable UI components with React 18 and Tailwind CSS, following component-based architecture and clean code standards, and maintained the team codebase using Git with branch-based workflows

Education

BS: Computer Engineering, San Sebastian College Recoletos de Cavite 2026 | Cavite City, Philippines

Senior High School — STEM, San Sebastian College Recoletos de Cavite 2019 | Cavite City, Philippines

Skills

Frontend Development

- TypeScript
- JavaScript (ES6+)
- HTML5 / CSS3
- JSX
- React 18
- Next.js (learning)

UI/UX & Styling

- Tailwind CSS
- MUI v5
- shadcn/ui

Backend & Tools

- Firebase (Auth + Firestore)
- Socket.IO
- Recharts / Chart.js
- Cloudinary
- Vite / npm
- Git / GitHub
- Netlify

Certifications

- AI Learning Modules (12 hrs) — AIClassASEAN
- 4-Hr Hour of Code — DICT Region 2
- AI Ready ASEAN Seminar — Hello, AI World
- Hour of Code — AI Ready ASEAN Programme
- Hour of Code — AI for Oceans — Code.org
- Int'l Experts Sharing Meeting — SEAMEO TED

Projects

PhiNex, React, MUI, Socket.IO

- Built the React 18 + MUI monitoring dashboard for a PYNQ-Z2 ARM-FPGA phishing detection system — real-time threat streaming via Socket.IO with data visualizations powered by Chart.js

Fundo, React, JavaScript, Recharts, Tailwind, Vite

- Personal expense tracker with category breakdowns, spending summaries, and interactive Recharts visualizations — includes dark/light mode toggle

Developer Portfolio v1 & v2, HTML, CSS, React, TypeScript, shadcn/ui, Netlify

- Two-iteration portfolio — v1 in vanilla HTML/CSS, v2 rebuilt in React + TypeScript with shadcn/ui; both deployed on Netlify

Maze Runner, TypeScript

- Browser-based game built in TypeScript — practiced strict typing and modular game-loop architecture outside of web app development
